

NEW DATE! – REGISTER TODAY!

NETWORKING AND EDUCATION

Join us as we explore Cancer Care in 2024: Considerations for the Care Team and return to the clinic with a renewed perspective and practical tips that impact patient care.

Together, we'll consider the many facets of caring for patients with cancer, beginning with an honest presentation of the patient perspective – previvor, survivor, and metavivor. We'll delve into unique care models, break down the application of genetic testing and we'll end the day taking a deeper dive into the complexities of ethics in cancer care and the inherent challenges in striving to do what is truly beneficial for the patient.
