Your Fax Machine's Final Mission: Ending Prior Auth

With the bipartisan *Improving Seniors' Timely Access to Care Act* (H.R. 3514) awaiting a House floor vote, ASCO and other physician groups are coordinating to illustrate to Congress how onerous prior auth requirements are.

To highlight that many physicians are still forced to rely on outdated fax technology to secure prior authorization for necessary patient care, we're asking you and your members to fax a one-page "Stop the Faxing" flyer to your Representative.

To participate, please take the following steps:

1. **Identify Your Representative's Fax Number:** Please refer to **this spreadsheet**, which contains the dedicated fax numbers for all House offices. View PDF **here**.
2. **Fax the Campaign Graphic:** Choose one **"Stop the Faxing" one-pagers** and send it directly to your Representative's office.

If it feels ridiculous that we're asking you to send a fax in this day and age, that's the point. Doctors spend hours every week feeding paperwork into fax machines just to get life-saving treatments approved. If insurance companies insist on living in the 1980s, let's send Congress a high-pitched, screeching reminder of just how absurd this red tape really is.

Please reach out to **Ryan Strandlund** if you have any questions.
